* Spread has a floating value, the table indicates the minimum spread for the instrument. The average spread is shown in brackets if different from the minimum value. Spread for XAU/USD, XAG/USD, XPT/USD, and XPD/USD is floating, the table indicates the average value.

** Leverage is reduced when equity exceeds \$15 000 (or the equivalent sum in another currency at the Russian Central Bank rate as of the day the leverage is reduced). The leverage is increased when equity drops below \$10 000 (or the equivalent sum in another currency at the Russian Central Bank rate as of the day the leverage is reduced).

*** The instrument is available only for MetaTrader4.

**** The instrument is available only for MetaTrader5.

Swap rates are calculated on a daily basis and depend on the of interest rates difference between the countries that issue traded currencies. During the night from Wednesday to Thursday, swap is charged/accrued in a triple amount. From Thursday to Friday, the swap on ruble-denominated instruments is charged/accrued in a triple amount.

For currency pairs with five numbers after the decimal point, one point means the fourth number after the decimal point. For currency pairs with three numbers after the decimal point, one point means the second number after the decimal point.
